COVER LETTER

Dear HM Nayem,

Seems like you are seeking an expert full stack developer. I am super excited to hear about this job vacancy at your company. As you will see, I am a Front-end developer with 2+ years of experience using scripting languages such as HTML, CSS, and JavaScript. I am confident that I will be a perfect pick for your company.

I'm a highly self-motivated Web Developer who spends most of his time building applications, building reusable code for future use and optimized web pages maximum speed, implementing highly-responsive user interface components by deploying React concepts and writing application interface code via JavaScript and ReactJS workflows. I have also experienced to build websites using Reactjs and Nodejs workflows.

Beyond front-end coding chops, I'm also passionate about writing and sharing what I've learned both with my teammates and the broader web community. I really value the ability to not only perform web development work, but also help others improve their craft, because I've gained so much from others sharing their skills and knowledge.

On a team, I tend to help bring out a clearer sense of purpose and encourage clearer communication, resulting in better team results and a higher sense of satisfaction for all involved.

I love the excitement of working in a fast paced environment and am very adaptable to change.

As a candidate, I possess the skills necessary to make meaningful contributions upon joining a team.

Thank you for considering my application and I look forward to hearing from you.

Best Regards,

Shamim Ahmed Rian
